

WASHINGTON & GREENE COUNTY 2 METER NET

Calling the Washington & Greene County 2 meter net. This is WA3COM net control with (your call) at the mike. This is a directed net & all amateurs are invited to check in.

This net meets every Tuesday at 8 PM on the K3PSP repeater system, which is made up of repeaters transmitting on: 146.790, 147.285, 147.390, and 145.250 MHz in Washington County as well as 147.315 MHz in Greene County. The back-up simplex frequency is 147.54 MHz.

The purpose of this net is for training, to provide new hams a medium to gain experience in net operations, to discuss topics of interest, and to answer any questions anyone may have. When checking into the net, call net control, let up on the mike to see if you are doubling, then give your call phonetically.

Do we have any stations with emergency or priority traffic?

Do we have any stations with formal or informal traffic?

We will now take check-ins from stations on Echo-link.

We will now take check-ins from mobile or hand held stations.

We will now take check-ins from any station.

(NCS will take check-ins from as many stations as he/she wants before taking a break & acknowledging stations that have checked in. After taking check ins, open net up for comments or questions. After 5 stations have made comments take a break for more check-ins.)

This has been the Washington & Greene County 2 meter net sponsored by Washington & Greene County ACS, Washington Amateur Communications, & Greene County ARC. Anyone interested in ham radio is invited to check us out at the WACOM web site at wa3com.com. The WACOM 10 meter net will take place on 28.340 MHz at 9:30 PM this evening. The WACOM NBEMS digital training net will be on Wednesday at (8 PM – Standard Time, 9 PM – Daylight Savings Time) and the Washington & Greene County 2 meter net will return next Tuesday at 8 PM on the K3PSP repeater system.

We would also like to remind you to check into the following local 80 meter nets. The Western PA ARRL Health & Wellness Net meets Monday through Friday at 9AM on 3.983 MHz. The Western PA Phone Traffic net meets at 5:30PM daily on 3.918 MHz. The ARES HF net meets Saturdays at 9 AM on 3.983 MHz. Lastly, the Western PA ACS net meets on Sundays at 9 AM on 3.990.5 MHz.

We would like to thank all who participated or helped in any way in the operation of this net & those hams that stood by to give us a clear frequency to operate on. This is (your call) securing the net at () local time & returning the repeater to general amateur use.

(Net Control Stations, please send a net report with the number of check-ins and net duration to n3ws@arrl.net, if he is not present on the net.)
